

**Wie richtest du dein Zimmer ein?** *Imagine that you and your partner are living in the same dorm but different rooms. You and your partner describe the arrangement of the furniture/items in your room to each other. First, draw a few items in your own room (the top room). Then, take turns telling your partner where the objects in your room are, using the prepositions of place plus the dative case. Feel free to add objects of your own!*

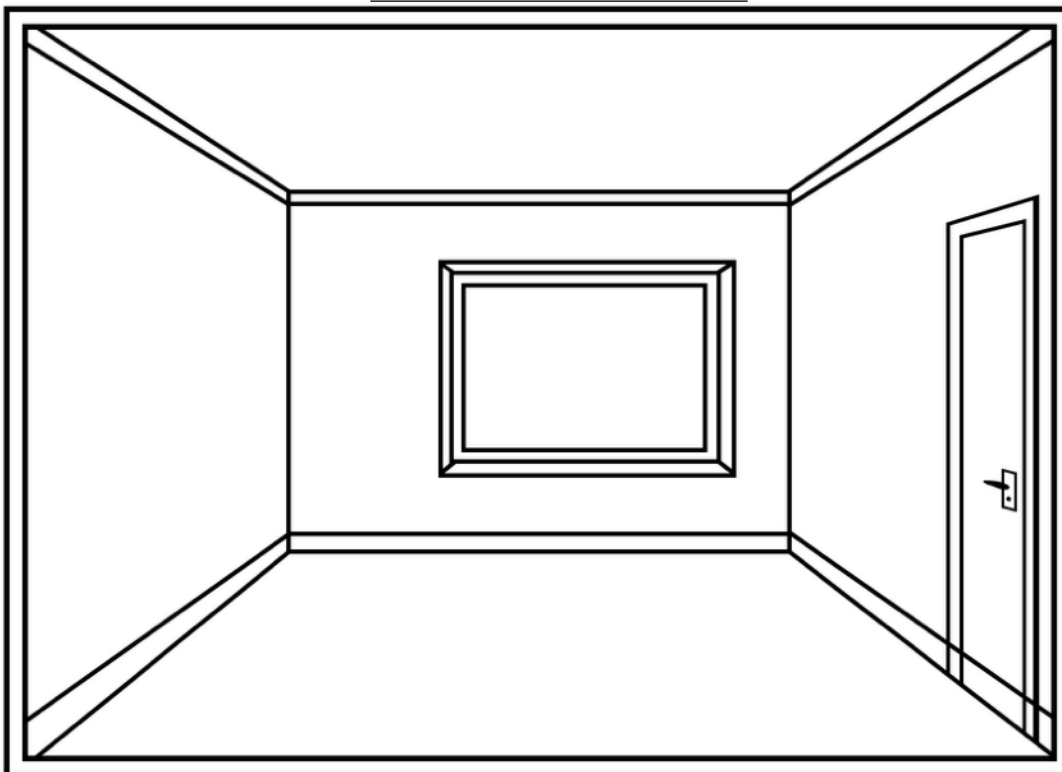

BEISPIEL: Mein Bett steht unter dem Fenster. Das Bücherregal ist links neben dem Bett.

As your partner describes his/her room, **DRAW** the objects and placements he/she is telling you in the lower room. When you're done, compare your drawings and see who was the closest to the original description!
